Osborne

As a developer, builder, and property service business, we are adopting increasing levels of offsite components, minimising vehicular movements, congestion and pollution; all of which makes for a safer environment for the communities in which we work.

Looking out for vulnerable road users

We are working with our employees, clients and supply chain to reduce the risks posed by construction vehicles to cyclists and pedestrians.

Mace has played a major role in improving the safety of vulnerable road users as a champion of the Construction Logistics and Community Safety (CLOCS) standard. We were also one of the first to implement work-related road risk guidelines across all of our construction sites.
